before the filling of all Appear Brief	Examiner	Art Unit						
	Stephen M Brinich	2624						
The MAILING DATE of this communication appears on the cover sheet with the correspondence address								
THE REPLY FILED 09 February 2005 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.  1. The reply was filed after a final rejection, but prior to filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:  a) The period for reply expiresmonths from the mailing date of the final rejection.								
The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.  Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).								
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).  NOTICE OF APPEAL								
2. The reply was filed after the date of filing a Notice of Appeal, but prior to the date of filing an appeal brief. The Notice of Appeal was filed on A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).								
AMENDMENTS  3. The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because  (a) They raise new issues that would require further consideration and/or search (see NOTE below);								
<ul> <li>(b) They raise the issue of new matter (see NOTE below);</li> <li>(c) They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or</li> <li>(d) They present additional claims without canceling a corresponding number of finally rejected claims.</li> </ul>								
NOTE: (See 37 CFR 1.116 and 41.33(a)).	-

#### DETAILED ACTION

#### Response to Arguments

1. Applicant's arguments filed 2/9/05 have been fully considered but they are not persuasive.

Re claim 8 (and similar claims 10 & 13, and dependent claims 9 & 11-12), Applicant argues (2/9/05 Remarks: page 2, line 21 - page 3, line 19) that the recited element of "developing the first image data" corresponds to the step S301 of Onodera (rather than the step S307 of Onodera as set forth in the rejection of record) because the step S301 of Onodera includes the sending of image data in page description language (which corresponds to the form of the recited "first image data") to a printer from a host computer.

Examiner agrees that the page description language of Onodera corresponds to the "first image data" of the claims. However, it is not clear why the recited step of "developing" this "first image data" necessarily corresponds to the step of sending this data from a host computer to a printer (step S301 of Onodera) and not to the step within the printer of processing this data into a form in which it will be sent to the printing output elements (step S307).
